## EDUCATION

- **University of Minnesota, Twin City** Minneapolis, MN, USA  
*Doctor of Philosophy in Computer Science* Sep. 2023 - Now
- **Northeastern University** Boston, MA, USA  
*Master of Science in Robotics; GPA: 3.92* Sep. 2021 - Jul. 2023
- **Virginia Polytechnic Institute and State University** Blacksburg, VA, USA  
*Bachelor of Science in Computer Engineering; GPA: 3.25* Aug. 2016 - May 2021  
*Major: Controls, Robotics, and Autonomy Minor: Mathematics & Biomedical Engineering*

## RESEARCH EXPERIENCE

- **Robot Learning and Manipulation - The Helping Hands Lab** Northeastern University  
*Research Assistant - Supervised by Prof. Robert Platt* Nov. 2021 - Jul. 2023
  - **Sample Efficient Equivariant Reinforcement Learning** ([Link](#))
    - Designed collision detection and avoidance algorithm for robot arm in Python.
    - Implemented and tested a sample-efficient equivariant grasp learning algorithm on a robot arm platform.
  - **Imitation Learning** ([Link](#))
    - Developed simulation learning environments for robot manipulation using PyBullet.
    - Conducted real-world robot imitation learning experiments for solving household tasks on UR5 with ROS.
- **Shark Genus Identification from Images - SharkPulse** Virginia Tech  
*Undergraduate Research - Supervised by Prof. Edward Fox and Prof. Francesco Ferretti* Jan. 2021 - Jun. 2021
  - **Data Process** ([Link](#))
    - Performed data preprocessing, including data augmentation, noise reduction, and object identification.
  - **Machine Learning and Image Classification** ([Link](#))
    - Applied networks including VGG16, ResNet with inception v2 and v3 models for classifying shark genus and achieved 70% accuracy across top 20 species with approximately 8,000 images.
    - Built a novel classifier for solving challenging bio-hierarchical classification tasks in small species datasets.
- **Finger Vein Recognition and Cipher Application** Changchun University of Technology  
*Assistant Researcher - Supervised by Prof. Jianwei Guo* Aug. 2018 - May 2019
  - **Image Preprocessing and Augmentation**
    - Implemented both rotation corrections on excused images using OpenCV and edge detection using Sobel algorithm.
    - Structured a region proposal network to localize the Region of Interest.
  - **Deep Learning:** Built a finger vein recognition network with ResNet using PyTorch.

## TEACHING EXPERIENCE

- **Reinforcement Learning and Sequential Decision Making, CS4180/5180** Northeastern University  
*Teaching Assistant - Prof. Christopher Amato* Fall 2022
  - **Course Materials Design:** Designed exams and problem sets on Bandits, TD-learning, DQN and MDP.
  - **Mentoring and Grading:** Held TA office hours and online discussions on homework and projects.
- **Pattern Recognition and Computer Vision, CS5330** Northeastern University  
*Teaching Assistant - Prof. Bruce A. Maxwell* Spring 2023
  - **Mentoring and Grading:** Held online discussions on projects and C++ OpenCV tutorials.

## WORK EXPERIENCE

- **DJI Robomaster Research and Development Center** Shenzhen, China  
*R & D Engineer, Summer Internship - Supervised by Mr. Chuan Yang and Mr. Qun Dong* Jun 2019 - Aug 2019
  - **Overall Duties:** Designed a new missile launching robot, with missiles, launcher, and launch silo components, which was used to substantiate new rules for the 2020 DJI Robomaster competition.
  - **Mechanical Design:** Designed missile airfoils and supplied fringes with flow simulation and aerodynamic analysis.
  - **Control System and Embedded Software Design**
    - Engineered a PID-based feedback controller for missiles and achieved agile control and precise landing performance.
    - Developed a basic embedded framework for missiles using C with Keil's embedded development tool.
    - Designed internal programs for missiles to achieve auto-targeting at a distance of 20-30m with OpenCV.

## PUBLICATIONS

- Mingxi Jia\*, Dian Wang\*, **Guanang Su**, David Klee, Xupeng Zhu, Robin Walters, Robert Platt. *SEIL: Simulation-augmented Equivariant Imitation Learning.*([Link](#)) **2023 IEEE International Conference on Robotics and Automation (ICRA)**. (Also presented in **Workshop on Sim-to-Real Robot Learning**, CoRL 2022.)
- Xupeng Zhu, Dian Wang, **Guanang Su**, Ondrej Biza, Robin Walters, Robert Platt. *On Robot Grasp Learning Using Equivariant Models.* ([Link](#)) **Autonomous Robots Journal** **2023**, 04 July 2023.
- Xupeng Zhu, Dian Wang, Ondrej Biza, **Guanang Su**, Robin Walters, Robert Platt. *Sample Efficient Grasp Learning Using Equivariant Models.*([Link](#)) **Robotics: Science and Systems (RSS) 2022**. (Also presented in **RLDM 2022 & Workshop on Scaling Robot Learning**, ICRA 2022.)

## ACTIVITIES

- **Bionic Bat Robot - Bioinspired Science & Technology Lab (BIST)** Virginia Tech  
*Interdisciplinary Research - Supervised by Prof. Rolf Müller* Sep. 2020 - Jan. 2021
  - Developed a stereo vision detection model based on ConvNet with Python and OpenCV library.
  - Detected and recorded a bat robot's motions during real-world tunnel flying tasks.
  - Recorded flight patterns in simulated forest environments while avoiding collisions using integrated sensing systems.
- **RoboGrinder, Team of DJI Robomaster University Championship** Virginia Tech  
*Chief Mechanical Engineer and Electrical Group Member* Oct. 2017 - Oct. 2019
  - **Team Lead of Engineering Robot**
    - Arranged project agenda for designing, prototyping, installing and testing stages.
    - Led a team of 6 to design a robot for climbing stairs and auto-grasping boxes.
    - Carried out 3D model design in SolidWorks and assembled the robot with 3D printing and other materials.
    - Collaborated with other teams to discuss re-supply and rescue capabilities for the robot.
  - **Software Embedded Design and Vision Detection**
    - Optimized robot structure with ROS to improve movement efficiency.
    - Simulated a 3-DoF low-fidelity control model with OpenCV-based infrared camera detection in Gazebo to achieve intelligent positioning for the robotic manipulator.
    - Conducted hardware programming control in C to resolve communication restriction problems between the robot arm and the embedded system.
- **VT inVenTs Rocketry, Team of Midwest High-Power Rocket Competition** Virginia Tech  
*Member in Mechanics Team* Sep. 2016 - Jun. 2017
  - Designed and assembled the power system for J and K rocket types.
  - Developed a drag system to manipulate height during flight.
  - Programmed with Arduino to control the ignition, detachment drag control and parachute stages of flight.

## PROJECTS

- **End-to-End Scene Flow Estimation and Application (Link):** Implemented scene flow estimation with point-voxel correlation fields from point cloud data with PyTorch.
- **ORB-SLAM3 on iPhone (Link)**
  - Implemented ORB-SLAM3 on a host computer using pre-recorded indoor and outdoor videos from monocular cameras.
  - Achieved real-time off-iPhone detection process by using remote video streaming through WiFi connection.
  - Developed an on-iPhone ORB feature detector with a user-friendly graphic interface.
- **Robot Manipulation with Hindsight Experience Replay (Link)**
  - Implemented a Hindsight Experience Replay reinforcement learning with Deterministic Policy Gradient algorithm.
  - Improved sample efficiency in goal-conditioned robot arm environments from OpenAI Gym.
- **Background Removal and Inpainting**
  - Built an object detection method by decoupling foreground and background objects.
  - Reconstructed images by removing unwanted crowds from portrayed pictures with inpainting technology, CycleGAN.
- **Autonomous System Serial-Link (6-joint) Robotic Manipulator:** Developed a motion and movements manipulator with forward and backward kinematic calculation and MATLAB visualization.
- **Miniature Online Banking App**
  - Developed a C++ application that simulated an online banking app with a Text-based User Interface (TUI) with functions such as withdrawal, deposit, balance check and accounts information display.
  - Improved TUI to a GUI appearance window with multi-thread and concurrency processing capabilities with Qt library.

## HONORS AND AWARDS

- 2nd Prize in the Robomaster 2019 Final Tournament August 2019
- Special Award in the Robomaster 2019 International Regional Competition August 2019
- 2nd Prize in the Robomaster 2018 Final Tournament July 2018
- 1st Prize in the Robomaster 2018 International Regional Competition July 2018
- 2nd Prize in NASA's Space Grant Midwest High-Power Rocket May 2017
- Hypatia and Galileo inVenTs Living-learning Communities Scholarship, Virginia Tech August 2016

## SKILLS SUMMARY

- **Programming Languages:** Python, Java, Processing, C++, C, MATLAB, Swift, JavaScript/HTML/CSS, LaTeX
- **Robotics:** Robot Operating System(ROS), UR5, Arduino, Raspberry Pi, STM32
- **Frameworks:** PyTorch, TensorFlow, OpenCV, Keras, Django, Flask, NodeJS
- **Tools:** Ubuntu, Git, Gazebo, XCode, Godot, Keil, SolidWorks, Creo, Adobe Premiere
